SUMMARY

Python Full Stack Developer with 1.4+ years of hands-on experience building secure and scalable web applications using Python, Django, Django REST Framework, React.js, and REST APIs. Experienced in HRM systems, biometric integration, JWT authentication, RBAC, PostgreSQL, MySQL, AWS S3, and workflow automation. Strong focus on clean code, performance, and maintainable application development.

EXPERIENCE

Junior Backend & Python Developer (Full Stack) Jul 2025 — Present
Beeyoond Gaming (Sportstech GmbH, Germany)
Developed full-stack applications using Python, Django, DRF, React.js, and REST APIs.

- Built and maintained 11 HRM modules supporting 100+ employee records with JWT authentication and RBAC.
- Integrated biometric devices through IP-based connectivity to automate employee check-in/check-out and attendance tracking.
- Developed responsive email templates and newsletter systems optimized for Gmail, Outlook, and mobile clients.
- Contributed to interactive 3D product visualization and React-based web applications.

SKILLS & INTERESTS

Languages: Python, JavaScript
Frontend: React.js, HTML5, CSS3
Backend: Django, Django REST Framework (DRF), Flask, REST APIs, JWT
Databases: PostgreSQL, MySQL
DevOps/Cloud: AWS (S3), GitHub, GitLab
Tools: Git, Postman, FileZilla
Automation & AI: n8n, Claude, Google Gemini, OpenClaw, NotebookLM
Core Concepts: Authentication, Authorization, CRUD Operations, API Integration, Workflow Automation

PROJECTS

Human Resource Management System (HRM) (hrm.sportstech.team) Present

- Developed a full-stack HRM portal using React.js and Django to manage 100+ employee records, authentication, and role-based access.
- Built 11 HR modules including Employee Management, Leave, Attendance, Assets, Payslip, and Configuration with RBAC.
- Integrated biometric attendance directly via device IP address, mapping unique employee IDs to retrieve and store check-in/check-out data.
- Automated attendance and late-coming tracking using biometric data, reducing manual HR effort.
- Stack: Django, DRF, PostgreSQL, JWT Auth, Postman**

Newsletter Email Template System

- Developed responsive HTML & CSS email templates for marketing campaigns and newsletters, optimized for Gmail, Outlook, and mobile devices.
- Built reusable, brand-consistent templates with animations and cross-client compatibility for improved user engagement.
- Supported bulk email campaigns, enabling scalable delivery to thousands of subscribers with easy template customization.
- Stack: HTML, CSS, Email Design, Animations, Cross-client**

Email Automation R&D

- Researched and built an automated newsletter generation pipeline. Significantly reduced manual effort in email creation and improved the efficiency of bulk email delivery workflows.
- Stack: Python, Automation, Bulk Email**

360-Degree Product Viewer

- Developed an immersive 3D panoramic product viewer with 12+ user-triggered animation states and click-to-animate interactions, enabling customers to inspect products from multiple angles.
- Optimized WebGL rendering with custom shaders, reducing load time by 35% and contributing to a 20% reduction in product returns.
- Stack: JavaScript, HTML, CSS**

Interactive 3D Room Planner

- Built an interactive real-time 3D room planning tool using React.js, enabling users to visually design, customize, and arrange room layouts with physics-based interactions and cross-platform AR support.
- Designed an intuitive, user-friendly UI/UX for non-technical users, contributing to an 18% increase in average order value.
- Stack: React.js, JavaScript, CSS**

EDUCATION

Bachelor of Engineering - BE, Electrical, Electronics and Communications Engineering in Electrical, Jun 2017 — Apr 2020
Mangayarkarasi College of Engineering (GPA: 70%) Madurai, India

Diploma, Electrical, Electronics and Communications Engineering in Electrical, Feb 2014 — Jan 2017
College, Chekkanurani (GPA: 72%) Madurai, India

10th in School Education, Apr 2013 — Mar 2014
M N U Jayaraj Nadar Higher Secondary School (GPA: 70%) Madurai, India
